

What Can We Do!

The HIV/AIDS Pandemic is HUGE. What can we do? We start by doing something. Here is an outline to help us in Canada and our Canadian churches to take steps toward making a difference.

- Empower the churches in Africa with our efforts financially. Have our churches make an effort to help through Sunday School fund raising projects, youth and adult fund raisers, church wide fund raising and increasing our budget allotments to this needy area.
- Advertise short term mission building projects. Sponsor people from our churches to join teams for these projects.
- Raise awareness of HIV/AIDS in our world.
- Sponsor orphans and families who care for orphans on a monthly basis through the ACOP Orphan Care Ministry.
- Be sensitive to the specific and on-going needs of children who have been orphaned and be willing to help to assist in financially covering their basic living need of food.
- Be willing to assist in projects such as education health care and other ways that we take for granted.

There are many people in this world that we need to be “Jesus” to. Doing whatever we can to minister to their basic needs of life will bring the Spirit of Jesus Christ to these needy children.

“Stop doing wrong, learn to do right! Seek justice, encourage the oppressed.
Defend the orphan, plead the case of the widow.”
(Isaiah 1:17)
